Leadership is one of the principal interests of the social sciences. Drawing on psychology, sociology, anthropology and business studies as well as philosophy and history, this four-volume collection focuses on democratic leadership in the political sphere. What makes a successful political leader? How much influence can an individual really have? Why are so few top political leaders women? David Bell roots this collection in the classic works of Machiavelli and Weber, before turning to the work of the American political scientists who were the first to study leadership in a systematic way in the 1960s, and coming right up to date with the work of Skowronek and others. Key themes of the collection include:

- Theories of leadership
- Machiavelli and political leadership
- Weber's view of political leadership
- Leadership character
- Ethics of leadership
- The entourage - the leader’s team
- Political artifice in leadership
- The leadership effect

ABOUT THE SERIES:

The SAGE Library of Political Science series brings together the articles that have been most influential in shaping the discipline. Each multivolume set presents a collection of field-defining published works, both classical and contemporary, sourced from the foremost publications in the discipline by an internationally renowned editor or editorial team. They also include a full introduction, presenting a rationale for the selection and mapping out the past, present and likely future of each area.

The series covers both the key approaches to studying the discipline and the primary subfields that form the focus of political scientists’ work.

EDITED BY:

David S. Bell is Professor of French Government and Politics at the University of Leeds. His research career has involved work on political parties in Spain and France and in the European Parliament. In addition, he has carried out work on political leadership and on the nature of leadership in the western systems. He heads the Political Leadership group of the UK Political Studies Association.
